# 1 Introduction

## 1.1 Purpose

This document provides an analysis of the system in terms of assumptions, functional and non functional requirements needed to fulfill its main goals. It describes the domain in which the system will be deployed by presenting relevant scenarios and use cases and it highlights the software's limits and constraints.

The document is addressed to all the stakeholders affected by the software and is meant to be used by developers in order to realize a system that meets the purpose for which it was intended.

## 1.2 Scope

### 1.2.1 Description of the given problem

Morbi sed vulputate enim, quis vehicula metus. Morbi quis metus volutpat, pulvinar massa nec, lacinia nunc. Sed blandit euismod fringilla. Nullam elementum vel libero nec mattis.
